

Ways to prevent environmental pollution

How we can
change the
world?

Ways to prevent air pollution

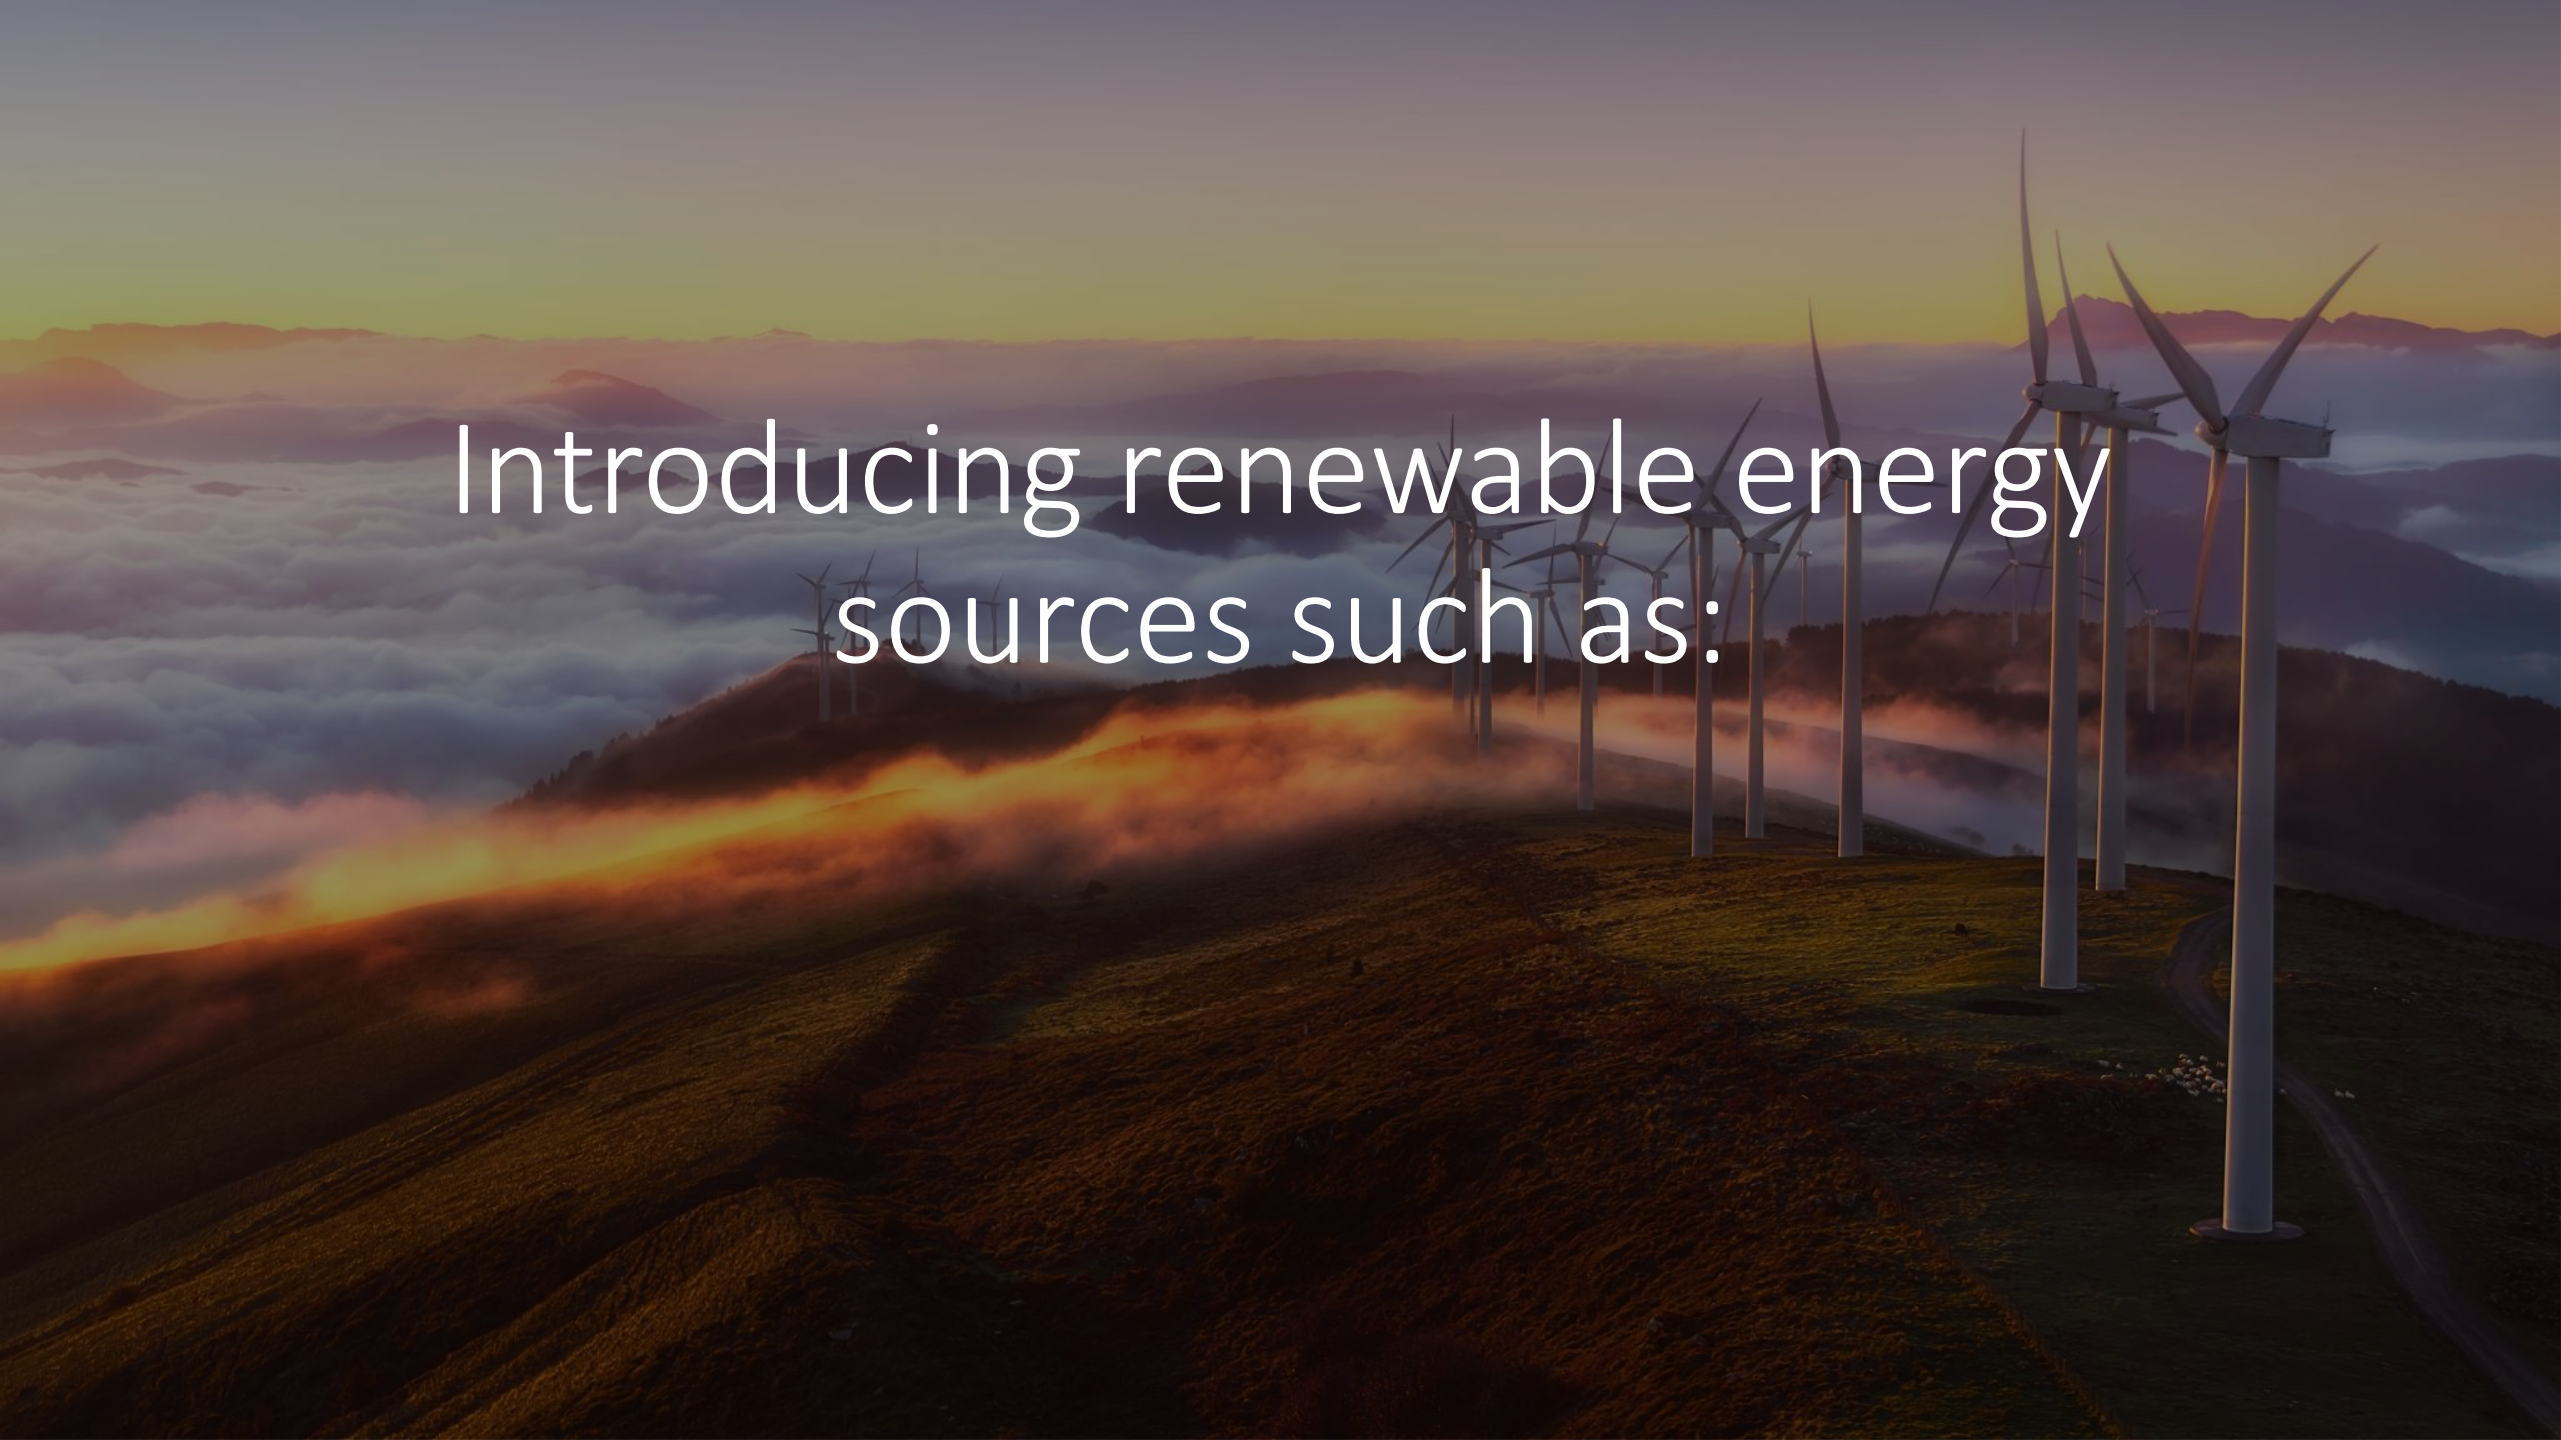

Using public
transport or
a bicycle

Eliminating heavy
transport in cities

A scenic landscape featuring a series of white wind turbines on a grassy hill. The scene is captured during sunset or sunrise, with a warm orange and yellow glow on the horizon. The sky is filled with soft, white clouds, and the overall atmosphere is serene and natural. The text "Introducing renewable energy sources such as:" is overlaid in white, sans-serif font, centered in the upper half of the image.

Introducing renewable energy
sources such as:

Solar panels

Wind turbines

Types of smog

- **Classic smog** (London)
- **Photochemical smog** (type Los Angeles)
- **Electromagnetic smog**

**WAYS TO PREVENT
WATER POLLUTION**

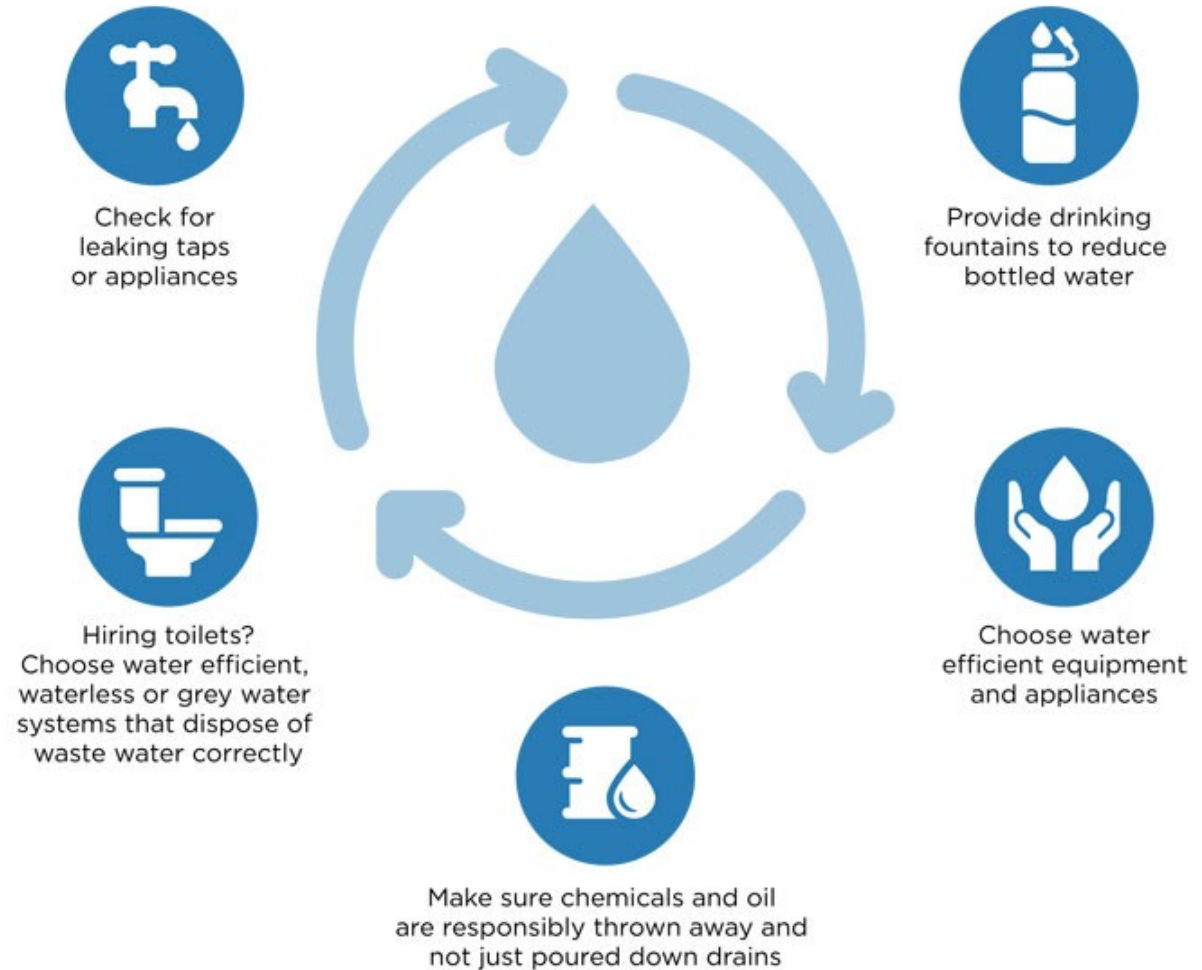

Water quality control

Eliminating the discharge of sewage into ditches, into fields, into inactive wells.

Rational water management

WATER MANAGEMENT TIPS

An underwater photograph showing a clear plastic bottle floating in the water. The bottle is partially filled with a yellowish liquid and has some debris inside. Surrounding the bottle are various pieces of trash, including a brown leaf, a small piece of wood, and some plastic fragments. The water is a deep blue-green color, and the scene is lit from above, creating a bright, slightly hazy atmosphere. A semi-transparent white circle is overlaid on the right side of the image, containing the text.

Limiting the amount
of rubbish thrown
into water

Building
new
sewage
treatment
plants

A close-up photograph of a person's hand pouring water from their palm onto a small green seedling growing out of a mound of dark, rich soil. The background is blurred, showing a soft green field under a bright sky. The text "WAYS TO PREVENT SOIL POLLUTION" is overlaid in white, bold, sans-serif capital letters across the center of the image.

WAYS TO PREVENT SOIL POLLUTION

Reduce your toxic waste levels

Recycle your waste

For example:

- Weaving old t-shirts to make a rug
- Removing the labels from your glass Vegemite jars and reusing them for storage
- Using egg cartons as seed starters
- Buying recycled items instead of new items

Reduce your waste in general

Some simple ways you can reduce your waste

- Using a compost bin
- Using reusable bags instead of plastic
- Avoiding disposable items

A young green plant with several leaves is growing out of a patch of dry, cracked earth. The ground is covered in a network of dark, irregular cracks, suggesting severe drought or soil degradation. In the background, a large, billowing cloud of white smoke or dust rises against a hazy, brownish-orange sky, creating a somber and polluted atmosphere.

What are the effects of soil pollution?

Devastating impacts on health

Soil with high levels of heavy metals poses health risks for humans and animals. Some examples of heavy metals include:

- Arsenic
- Lead
- Copper
- Nickel
- Mercury
